TECHNICAL SKILLS

- **Backend Engineering:** Python, FastAPI, REST APIs, Service-Oriented Layered Architecture, MVC
- **Real-time & Security:** WebSockets, WebRTC, SQLAlchemy (ORM), bcrypt, Pydantic, OAuth/OTP Workflows
- **Frontend Ecosystem:** React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vite, SPA Architecture
- **Databases:** MongoDB, MySQL, JSON Data Layers
- **DevOps & Infrastructure:** Linux (Ubuntu Server), Bare-Metal Deployment, Docker, Tailscale VPN, Git/GitHub

TECHNICAL PROJECTS

Hamnasheen (Family Call) | Python, FastAPI, WebSockets, WebRTC, MongoDB, Bare-Metal Ubuntu

- Architected a secure, private P2P communication platform using FastAPI, WebRTC, and WebSockets to enable real-time audio/video and instant messaging without third-party reliance.
- Deployed backend infrastructure independently on a bare-metal Ubuntu server, utilizing Tailscale for secure VPN-based remote access and network isolation.
- Engineered a strict MVC architecture integrated with MongoDB, decoupling business logic to ensure high maintainability and scalable database schema management.

Coder's Nest | FastAPI, MySQL, SQLAlchemy, React, Service-Oriented Architecture

- Designed the backend for a scalable collaborative coding platform using FastAPI and MySQL, strictly adhering to a robust Layered Architecture.

- Engineered a highly secure user management and authentication ecosystem using SQLAlchemy ORM, bcrypt password hashing, and dynamic OTP verification workflows.
- Structured modular API routes and rigorous schema validation layers utilizing Pydantic to support complex future workloads, ensuring robust data integrity.

My-Portfolio | React, Vite, Tailwind CSS, JSON Architecture

- Developed a highly responsive JSON-Driven Single Page Application (SPA) utilizing the modern frontend ecosystem of React, Vite, and Tailwind CSS.
- Implemented a strict decoupled architecture, isolating the presentation layer from the data layer to enable zero-latency content updates and scalable component rendering.

PROFESSIONAL EXPERIENCE

SHDPIXEL | Software Developer Intern | Oct 2025 – Feb 2026

- Engineered responsive frontend architectures for an internal CRM system using modern JavaScript frameworks, translating business requirements into scalable UI components.
- Prototyped an in-house real-time communication platform, researching and implementing core messaging features to streamline internal team collaboration.
- Maintained and optimized existing client applications by debugging legacy code, resolving UI/UX inconsistencies, and ensuring cross-browser compatibility.

Friendly IT Solutions | Web Developer Intern | July 2025 – Aug 2025

- Completed rigorous foundational training in web development paradigms, shadowing senior developers to understand the Software Development Life Cycle (SDLC).
- Built foundational UI prototypes using HTML5, CSS3, and JavaScript, focusing on semantic structure and responsive design principles.

EDUCATION

ITM (SLS) Baroda University, Vadodara, Gujarat Bachelor of Computer Applications (BCA) | Final Semester (Expected 2026)
